1. Purpose and Legal Basis.

The **Indigenous Law Acts** are based on the *Indigenous Protection Will Declaration* submitted to Eugenix P.S.A. This declaration authorizes Eugenix P.S.A. to officially safeguard the will of an Indigenous peoples, ensuring that their relationships, health priorities, and cultural needs are protected in accordance with the **(UNDRIP) United Nations Declaration on the Rights of Indigenous Peoples (A/RES/61/295) (2007).**

The Indigenous Law Act serves as a **written legal reference document of the Indigenous person's will**, to be used in all public institutions—especially **education** and **healthcare**—where Indigenous peoples may require protection from unwanted relationships or interactions. Institutions have a legal duty to respect Indigenous rights, while the Indigenous peoples have the right to announce their status whenever beneficial.

Because individual institutions may have different procedures for implementing Indigenous protections, Indigenous peoples are encouraged to **announce their status as early as possible**, as other Indigenous persons do, to ensure full benefit of the protections available.

2. Legal Usage in Private Institutions.

The Indigenous Law Act also applies to **private institutions**, including employment, religious, and sports organizations. Indigenous persons should announce their status whenever beneficial so that staff can recognize their protection will and intervene if unwanted relationships arise—even in unexpected situations.

In many cases, the Indigenous person may find it difficult to verbally express distress. When staff are aware of the person's Indigenous status and protection will that is officially established thru the Indigenous Law Act, they can analyze the situation and provide help without requiring the person to speak or make-up exit strategies which is often essential given the nature of the inter-indigenous problem.

3. Health Usage.

Individuals experiencing medical conditions or symptoms related to *Heterotrichosis, Heterochromia, Heterodermia, Albinism, Epidermolysis Bullosa, or Neurocutaneous Melanosis* will benefit from the Indigenous Law Acts, thru an official reminder to protect their own **ethnic health** and **heritage** reenabling their indigenous knowledge and indigenous partner selection. The Act supports the

restoration of natural indigenous biological health of polar and sub-polar indigenous phenotypes. More information's related to indigenous reproductive health can be found in the short publication titled: *Eugenix® Indigenous Heritage — Indigenous Climatic Procreation.*

4. Issuance Rules.

The Indigenous Law Acts will benefit **full-ethnic monogenous** indigenous persons and **semi-ethnic heterogenous** indigenous persons who wish to protect own indigenous physical traits such as **hair, skin, and eyes** with the support of Eugenix P.S.A. Indigenous Heritage Protection Program.

Although Eugenix P.S.A. is an Indigenous Company established by and for the Arcticus Blancus indigenous and native polar hair ethnic tribal group we will continue accepting declarations and issuing Indigenous Law Acts for all **Ethnic Hair Types and Colors ranging from A0–D7**, covering the full spectrum of all Indigenous human hair, skin, and eye groups.

Eugenix P.S.A. hopes that our Indigenous Heritage Protection Program model will inspire similar programs worldwide among non-Arcticus Blancus indigenous groups. Eugenix P.S.A. also hopes that United Nations and UN member states will support, when necessary, all vital indigenous organizations and ethnic protection initiatives aimed to prevent genocide among endangered and non endangerd indigenous individuals and indigenous groups.

5. Indigenous Affiliation and Membership Clarification.

Indigenous Law Acts issued by Eugenix P.S.A. does not enroll or assign any indigenous person named in the Act to an indigenous group. Determining own indigenous affiliation requires following your personal ethnic heritage across both physical and non-physical characteristics — including hair, skin, eyes, language, culture, religion, beliefs, diet, climate adaptation, and related traits — until you discover your Indigenous self and group, or until your indigenous peers and group recognizes you.

The Arcticus Blancus indigenous and native polar-hair ethnic group, like other indigenous peoples, regulate membership through a set of rules, the most important of which are the principles of Indigenous Heritage Protection. Arcticus Blancus membership for example is regulated by rules published in the *Eugenix® Ethnic Hair Quantum - Climatic Work Ethnic Predisposition*, *Eugenix® Indigenous Reservations - Admittance Guidelines, Eugenix® Indigenous Health - Ethnicities and Outdigenous Conditions,* available on eugenix.org.

6. Validity Term.

The maximum validity of an Indigenous Law Act issued to **unverified individuals** is **2 years**. Eugenix P.S.A. cannot issue a longer-term Act without physical verification of physical biological characteristics of hair, skin and eyes that can vary due to heterogenous ancestry.

In order for for Eugenix P.S.A. to issue an Indigenous Legal Act valid for more than two years, applicants must—throughout their lives, starting from birth or the moment they acquire the journal—record their indigenous physical traits in a dedicated ethnic journal, such as the *Eugenix® Indigenous Health — Hair Changes Journal Book* (ISBN 978-83-68580-00-6), thereby documenting the constancy of or changes in the physical characteristics of their hair, skin, and eyes.

The Act remains valid only as long as the protected physical characteristics remain visible. If your ethnic hair type or colors change to a different type or color before the Act might be outdated and require a new declaration of will that includes changed characteristics or broader or wider range of physical characteristics to be listed for protection.

7. Personal Identity Verification.

Eugenix P.S.A. for the proof of identity requires from all applicants a single photograph of the front and back of government issued identification listed in the *Eugenix® Indigenous Heritage - Protection Will – Form*. Photographs of the government issued Identification submitted via mail to Eugenix P.S.A. must be labeled on the back side with applicant's own name using capital letters and the full date of birth (YYYY-MM-DD).

8. Hair Verification.

Eugenix P.S.A. requires from each applicant photograph of the applicant's hair types and color, the actual ethnic hair samples submitted in a zip lock bag are not mandatory. The photographs of applicant's ethnic hair are a mandatory proof of own ethnic hair types and colors as naturally present on the applicants' physical bodies as stated in the *Eugenix® Indigenous Heritage - Protection Will – Form*.

All ethnic hair samples submitted to Eugenix P.S.A. as a proof of own ethnic hair will be used to develop digital and printed *Eugenix® Ethnic Hair Color Classification Catalog* that will make future processes of own ethnic hair determinations easier for all indigenous applicants.

All photographs of own ethnic hair submitted to Eugenix P.S.A. specified in the *Eugenix® Indigenous Heritage - Protection Will – Form* must come from the actual applicant that applies for the Indigenous Law Act not immediate family member or other persons. Applicant's submitted photographs will also serve as evidence of their own skin phototype.

Ethnic hair samples *Eugenix® Ethnic Hair Color Classification Catalog* should be collected from body parts where they naturally occur and should be in their natural length from the place they are taken. Each ethnic hair type and color donated to Eugenix P.S.A. should be in a minimum number of 2 hairs and no more than 100 hairs.

Submitted to Eugenix P.S.A. ethnic hair donations will only be used for photographing, color measuring and cataloging. Eugenix P.S.A. does not use donated hair samples for genetic ancestry research. Eugenix P.S.A. reserves the right to safely dispose all hair samples received without any notice to indigenous applicants due to limited purpose and limited storage facilities.

9. Skin Verification.

All applicants should safely determine their own skin phototype using the Fitzpatrick scale (1-5) that is parallel to the Eugenix P.S.A. scale, that expanded Fitzpatrick values with 0(0), 6(VI), 7(VII), which allow to record ultra-light and ultra-dark skins.

The skin phototype selected in the *Eugenix® Indigenous Heritage - Protection Will – Form* must be determined by applicants based on their own knowledge and experience using the Fitzpatrick scale 0-5, but reported in the *Eugenix® Indigenous Heritage - Protection Will – Form* using Eugenix P.S.A. scale (0-VII),

In Eugenix P.S.A. scale (0) is snow white skin (~CYMK 0,0,0,0) such as in the Polar Mammals like white polar wolves and white polar foxes, and where (VII) is charcoal black skin (~CYMK 100,100,100,100) as in the Rafaltic Mammals like black gorillas and black horses. Applicant's submitted photos will also serve as evidence of their own skin phototype.

10. Eyes Verification.

Where possible, applicants should submit photographs of their eyes as evidence of the characteristics listed in the *Eugenix® Indigenous Heritage – Protection Will* form; these include the colors and shades of the orbital (outer) Oris zones and radial (inner) Iris zones—, which may vary depending on indigenous mono-climatic, indigenous hetero-climatic, cross-climate migration, and prevailing or changing climatic conditions.

However, due to the high cost of professional eye photography, Eugenix P.S.A. does not currently require the submission of such images. We merely ask candidates to specify the colors and shades of the outer orbital iris and the inner radial iris of their eyes, to account for any biological and physical characteristics associated with their indigenous ancestral origins.

11. Recommended Readings.

The Recommended Readings section directs observers to foundational materials that deepen understanding of Indigenous hair variation, phenotype expression, and the cultural significance of protecting and documenting hair changes across the lifespan. These texts and resources provide scientific, ethnographic, and historical context collected by Eugenix P.S.A. to support accurate and responsible use of the *Eugenix® Indigenous Health — Hair Changes Journal Book.*

By engaging with these readings, observers gain a clearer understanding of why hair changes occur, how they relate to ancestry and environmental adaptation, and why consistent documentation is essential for long-term health interpretation and Indigenous identity protection. This section strengthens the observer's ability to interpret journal entries responsibly and ensures that each recorded change is understood within a broader framework of Indigenous knowledge and contemporary research.

Because many of the recommended materials are prepared directly by the Founder and President of Eugenix P.S.A., readers should be aware that some documents may contain grammatical inconsistencies or terminology that is not yet widely known, standardized, or universally accepted. This reflects the emerging nature of Indigenous phenotype research and the ongoing difficulty of developing precise definitions within Arcticus Blancus, non-Arcticus Blancus, and multi-Indigenous climatic phenotype studies.

(I) Indigenous Health

a. *Eugenix® Indigenous Health - Hair Changes Journal Book Instructions*
b. *Eugenix® Indigenous Health - Terminology of Unclassified Hair Disorders*

c. *Eugenix® Indigenous Health - Ethnicities and Outdigenous Conditions*
d. *Eugenix® Indigenous Health - Indigenous Heritage Procreation*
e. *Eugenix® Indigenous Health - Neuro-Chemical and Neuro-Psychological Sexual Communication*

(II) Indigenous Heritage

b. *Eugenix® Indigenous Heritage - Classification of Sub Climatic Tribal Ethnicities*
c. *Eugenix® Indigenous Heritage - Protection Will - Declaration Instructions*
d. *Eugenix® Indigenous Heritage - Protection Forms Set (EN)(PL)*

(III) Ethnic Hair Quantum

a. *Eugenix® Ethnic Hair Quantum - Climatic Hair Ethnic Classification*
b. *Eugenix® Ethnic Hair Quantum - Climatic Work Ethnic Predisposition*

12. Publications and Forms Access.

The complete set of Eugenix P.S.A. recommended readings and Indigenous protection forms referenced in this Act is available free of charge through the access links listed below. These materials include foundational texts on Indigenous health, phenotype documentation, heritage protection, and the Arcticus Blancus climatic identity framework. All above mentioned Eugenix P.S.A. recommended readings and protection forms can be access for free thru links provided below.

All applicants to the Indigenous Law Act—particularly Indigenous Arcticus Blancus applicants—are strongly encouraged to download and study these resources. As the Act notes, applicants should review the materials to understand the scope of Eugenix P.S.A. to determine and decide whether you are a person that seeks and can benefit from an indigenous protection offered by Eugenix P.S.A.

This ensures informed decision-making, proper self-identification, and accurate completion of the declaration form to protect indigenous heritage *Eugenix® Indigenous Heritage – Protection Will.*

Access Links:

1. ***Archive.org Collection:*** **https://archive.org/details/@kris_pawlak**
2. ***Scribd Collection:*** **https://www.scribd.com/user/896245161/krispawlak**

These resources, along with additional writings, will be collected into a book that contains all written works of Eugenix P.S.A. This forthcoming volume will serve as a unified reference for the

scientific, cultural, and legal foundations of the *Arcticus Blancus Indigenous Polar Hair Tribe*. It reflects the organization's mission as a Simple Share Company created to protect *Arcticus Blancus* polar hair tribal persons affected by generations of multi-indigenous relations that result in diminished indigenous health and uncertain future of the *Arcticus Blancus* and earth's climate.

13. Indigenous Law Acts Ordering.

1. **To order Eugenix P.S.A. Indigenous Law Act via email:** Please send properly filled Declaration with photographs to Eugenix P.S.A. email address. Non mandatory Ethnic Hair samples can be sent to Eugenix P.S.A. physical mail address.

2. **To order Eugenix P.S.A. Indigenous Law Act vis paper mail:** Please send properly filled Declaration with paper photographs to Eugenix P.S.A. physical mail address. Non mandatory Ethnic Hair samples can be sent to Eugenix P.S.A. physical mail address.

3. **To order Eugenix P.S.A. Indigenous Law Act via office appointment:** Please contact Eugenix P.S.A. via email, sms or telephone to check for open appointment times.

4. **To order Eugenix P.S.A. Indigenous Law Act during Indigenous Heritage Protection Event:** Please visit Eugenix P.S.A. website https://www.eugenix.org/index to check for indigenous heritage event announcements.

14. Processing and Printing Fees.

(All prices include VAT)

The following fees apply to the preparation, processing, and printing of Indigenous Law Act documents and related materials. These charges cover the administrative handling, verification, and production of official paper versions in Polish language or and in English language, as well as the creation of additional certified duplicate copies if ordered.

As stated in the fee schedule below, core documents such as the *Rdzenny Akt Prawny* and the English *Indigenous Law Act* paper versions are priced at **123 PLN** each, while additional certified copies are available for **31 PLN**.

Some digital services such as upload of applicant data to the official *Eugenix.org / Index of the Indigenous Peoples* —is included at no extra cost while the password-protected PDF version of the *Indigenous Law Act* that can be downloaded from the *Index of the Indigenous Peoples* that currently not available will be included in the price upon availability.

Certain optional items, such as silicone NFC-ID bracelets and plastic NFC-ID cards, are also unavailable at this moment. Eugenix P.S.A. currently investigates this technology and their applications.

a) Rdzenny Akt Prawny *w języku Polskim (PL) z Prawem Polskim* - Druk Oryginalny - **123 PLN**
b) Rdzenny Akt Prawny *w języku Polskim (PL) z Prawem Polskim* - Duplikat Druku - **31 PLN**

c) Indigenous Law Act *in English Language (EN) with Polish Laws* - Printed Original - **123 PLN**
d) Indigenous *Law Act in English Language (EN) with Polish Laws* - Printed Duplicate - **31 PLN**
e) Indigenous Law Act *in English Language (EN) with Other Laws* - Printed Original - **123 PLN**
f) Indigenous Law Act *in English Language (EN) with Other Laws* - Printed Duplicate - **31 PLN**

g) Upload of Indigenous Law Act Data such as: Indigenous Person Name, Birth Town, Birth State and Act Number into the *Eugenix.org/Index of the Indigenous Peoples* - Included in the price.

h) Upload of the password protected Indigenous Law Act PDF version into the *Eugenix.org/Index of the Indigenous Peoples* - Included in the price once option is available.

i) Silicone NFC-ID Bracelet programmed with *Eugenix® Ethnic Phenotype Code* that allows Indigenous persons with NFC-ID Bracelet to quickly establish whether they are under a compatible indigenous protection or a diffrent indigenous protection with diffrent *Eugenix® Ethnic Phenotype Code*. - Currently not available.

j) Plastic NFC-ID Card programmed with *Eugenix® Ethnic Phenotype Code* that allows Indigenous persons with Plastic NFC-ID Card to quickly establish whether they are under a compatible indigenous protection or a diffrent indigenous protection with diffrent *Eugenix® Ethnic Phenotype Code.* - Currently not available.

15. Packaging, Handling and Shipping Fees.

a) Mandatory Packaging and Handling Fee - Included in the price.
b) Global Express (Poczta Polska) - European States[d] - **39 PLN**
c) Global Express (Poczta Polska) - Rest of the World[d] - **49 PLN**
d) https://cennik.poczta-polska.pl/usluga,zagraniczny_global_expres.html

Alternative shipping options are available exclusively through postal services prepaid by the indigenous clients themselves. Arrangements for the pickup of the shipment from the Eugenix P.S.A. premises must be made by the indigenous client using any postal or courier company offering such a service (e.g., UPS, FedEx, DHL, PDP, inPost). The costs of such shipments must be paid directly by the clients to the courier or postal companies of their choice.

16. Eugenix P.S.A. Bank Details

Eugenix P.S.A. does not process any refunds for documents mailed or ready to be mail to the Indigenous Peoples. Although telepathic communications are possible Eugenix P.S.A. can only answer questions and requests communicated via internet email, physical mail, telephone text messages and calls. Eugenix P.S.A. Bank account details are as follows and located on https://www.eugenix.org:

Beneficiary Name:	EUGENIX PROSTA SPÓŁKA AKCYJNA
Beneficiary Account:	PL23102023130000390211706548
Beneficiary Bank Name:	PKO Bank Polski S.A.
Beneficiary Bank BIC/Swift Code:	BPKOPLPW

17. Eugenix® Ethnic Hair Classification

Arctic Type A hair represents polar lineage of Arcticus Blancus and sub polar lineage of other Arctic hair defined by a spectrum of colors ranging from **A0 ultra light polar blond hair (*Blancus)*** to **A6 ultra dark blond hair (*Blunt)***. This range reflects the natural scale of adaptation of polar-origin individuals to extreme low-light environments, where translucent and semi-translucent hair shafts maximize the absorption of available radiation from the polar night sky.

A. ARCTICUS ETHNIC HERITAGE COLORS.

0. **(Arcticus Blancus)** Tribe of Ultra White Arctic Blanc Hair. (CMYK-RGB Range TBA)
   Approximate natural climatic territory based on hair pigmentation from 90° N to 62° N.
1. **(Arcticus Blondus)** Tribe of Light Blond Hair. (CMYK-RGB Range TBA)
   Approximate natural climatic territory based on hair pigmentation from 62° N to 51° N.
2. **(Arcticus Blontus)** Tribe of Medium Light Blont Hair. (CMYK-RGB Range TBA)
   Approximate natural climatic territory based on hair pigmentation from 62° N to 51° N.
3. **(Arcticus Blendus)** Tribe of Medium Blend Hair. (CMYK-RGB Range TBA)
   Approximate natural climatic territory based on hair pigmentation from 62° N to 42° N.
4. **(Arcticus Blentus)** Tribe of Medium Dark Blent Hair. (CMYK-RGB Range TBA)
   Approximate natural climatic territory based on hair pigmentation from 62° N to 42° N.
5. **(Arcticus Blundus)** Tribe of Dark Blund Hair. (CMYK-RGB Range TBA)
   Approximate natural climatic territory based on hair pigmentation from 51° N to 42° N.
6. **(Arcticus Bluntus)** Tribe of Ultra Dark Blunt Hair. (CMYK-RGB Range TBA)
   Approximate natural climatic territory based on hair pigmentation from 51° N to 42°N.

B. COARCTICUS ETHNIC HERITAGE COLORS.

Co-Arctic Type B red hair encompasses co-indigenous subpolar lineage, with colors ranging from **B1 lightest red hair (*Blod) to* B6 ultra dark hair (*Burgt).*** This group represents individuals with multi-indigenous ancestry of Arctic climatic traits and Rafaltic/Aquatic climatic traits, resulting in red hair that carries patterns of both climates. Type B hair often displays a natural copper, ember, or deep-red undertone that intensifies or softens depending on environmental conditions, psychological states, and the individual's indigenous heritage. Its chromatic depth is considered a marker of both climatic resilience and ancestral diversity.

0. **(Coarcticus Albus/Albinus)** Reserved for Anthropologic and Genetic studies.
   Approximate climatic territory based on hair pigmentation from 90° N to 42° N.
1. **(Coarcticus Blodus)** Tribe of Light Blod Hair. (CMYK-RGB Range TBA)
   Approximate climatic territory based on hair pigmentation from 62° N to 51° N.
2. **(Coarcticus Blotus)** Tribe of Medium Light Blot Hair. (CMYK-RGB Range TBA)
   Approximate climatic territory based on hair pigmentation from 62° N to 51° N.

3. **(Coarcticus Brodus)** Tribe of Medium Brod Hair. (CMYK-RGB Range TBA)
   Approximate climatic territory based on hair pigmentation from 62° N to 42° N.
4. **(Coarcticus Brotus)** Tribe of Medium Dark Brot Hair. (CMYK-RGB Range TBA)
   Approximate climatic territory based on hair pigmentation from 62° N to 42° N.
5. **(Coarcticus Burgdus)** Tribe of Dark Burgd Hair. (CMYK-RGB Range TBA)
   Approximate climatic territory based on hair pigmentation from 51° N to 42° N.
6. **(Coarcticus Burgtus)** Tribe of Ultra Dark Burgt Hair. (CMYK-RGB Range TBA)
   Approximate climatic territory based on hair pigmentation from 51° N to 42°N.

C. COARCTICUS ETHNIC HERITAGE COLORS.

Co-Arctic Type C brown hair encompasses co-indigenous subpolar lineage, with colors ranging from **C1 light (*Burnd) hair*** to **C6 ultra-dark (*Brunet) hair***. This group represents individuals with multi-indigenous ancestry of Arctic climatic traits and Rafaltic/Aquatic climatic traits, resulting in brown hair that carries patterns of both climates. Type C hair is structurally adaptive to undergo prolonged exposure to natural radiation. Its tonal variations—ranging from warm brown to deep brunet—represent a balanced indigenous phenotype where climatic adaptation, genetic memory, and environmental interaction create a consistent yet responsive hair identity for hot climates with strong sun radiation.

0. **(Coarcticus Albus/Albinus)** Reserved for Anthropologic and Genetic studies.
   Approximate climatic territory based on hair pigmentation from 90° N to 42° N.
1. **(Coarcticus Burndus)** Tribe of Light Burnd Hair. (CMYK-RGB Range TBA)
   Approximate climatic territory based on hair pigmentation from 62° N to 51° N.
2. **(Coarcticus Burntus)** Tribe of Medium Light Burnt Hair. (CMYK-RGB Range TBA)
   Approximate climatic territory based on hair pigmentation from 62° N to 51° N.
3. **(Coarcticus Browndus)** Tribe of Medium Brownd Hair. (CMYK-RGB Range TBA)
   Approximate climatic territory based on hair pigmentation from 62° N to 42° N.
4. **(Coarcticus Browntus)** Tribe of Medium Dark Brownt Hair. (CMYK-RGB Range TBA)
   Approximate climatic territory based on historical exposure from 62° N to 42° N.
5. **(Coarcticus Brunedus)** Tribe of Dark Bruned Hair. (CMYK-RGB Range TBA)
   Approximate climatic territory based on hair pigmentation from 51° N to 42° N.
6. **(Coarcticus Brunetus)** Tribe of Ultra Dark Brunet Hair. (CMYK-RGB Range TBA)

Approximate climatic territory based on hair pigmentation from 51° N to 42°N.

D. RAFALTICUS / AQUATICUS ETHNIC HERITAGE COLORS.

Rafaltic and Aquatic Type D black hair represents a chromatic range for natural black hair, extending from **D0 white and gray hair (*Albus)* to D7 pure black hair (*Blacus).*** This group includes individuals whose indigenous origins are rooted completely outside of polar and subpolar environments characterized by hot and dry climate with regular-daily sun radiation or hot and humid climate with regular daily-humidity, where hair evolved in relationship to daily radiation.

Type D hair is normally black, with variations not affecting color reflecting an individual's ancestral adaptation to water-rich or water-poor high radiation and high temperate ecosystems. Black hair, due to various environmental and non-environmental reasons, can change color to silver and gray. Its structural properties—often thicker, more fibrous, or more reflective—demonstrate the unique climatic engineering of Rafaltic and Aquatic lineages.

0. **(Rafalticus-Aquaticus Albus/Albinus)** Reserved for Anthropologic and Genetic studies.
Approximate natural climatic territory based on hair pigmentation from 42° N to 42° S.
7. **(Rafalticus/Aquaticus Blacus)** Tribe of Completely Black Hair. (CMYK-RGB Range TBA)
Approximate natural climatic territory based on hair pigmentation from 42° N to 42° S.

With regards
